# Kyriakos Baltatzidis Curriculum Vitae

Personal Information:

Name: Kyriakos Baltatzidis

Email: kikosbssss@gmail.com

Github Profile: p18balt

Phone number: +306976738335

Date & Place of birth: 07 July 2000 Alexandroupoli

Education:

BSc in Informatics

Ionian University

Duration: 2018 - 2023

High-School leaving Certificate

Graduated in 2018

Grade of 18.5 18 & 5 tenths (18 5/10) out of 20. 1st High School, Komotini,Greece.

Research interests

My current research interests focus on Artificial Intelligence, Machine Learning, Browser Automation(Python, Java, Selenium), Data Mining, Networking and Security. Some of my latest research is on:

- Text Simplification using Artificial Intelligence , Machine Learning. It is a classification model that uses text data from Wikipedia in order to calculate the Simplicity of each sentence using features extracted using textstat library.(Status: In progress.)
- Using Machine Learning to predict the outcome of League of Legends games using data from the first 10 minutes of the game. (30 minutes average game length) (Artificial Intelligence Classification model)

Technical skills

Operating Systems
- Microsoft Windows 7, 10, 11
- Linux (Arch Linux, Kali Linux, Artix Linux)
- Mac OS

Programming Languages
- Python, C++, C, Java
Scripting Languages
- [Bash](), Powershell, Lua
Markup Languages
- HTML
Commercial packages
- Microsoft Office, Libre Office, Pages/ Keynote
- Weeka
- Adobe Photoshop
- Unity
Languages
- Greek (native)
- English (Proficiency level)

Skills
- I like to solve problems and problem solving is one of my favorite things to do and that is the reason why I am pursuing a career in IT, the art of problem solving. Taking a problem and breaking it into smaller simpler sub-problems and solving them makes the initial problem simpler to understand and hence solving it.
- I am able to work alone and with teams with the same result since I like learning and I can communicate excellently with everyone that wants to accomplish the same goals.
